

# ELIGIBILITY REQUIREMENTS

The Health Nucleus is a clinical research and discovery center. Please answer the questions to determine whether you are eligible to participate in the Health Nucleus study.

## PLEASE ANSWER THE FOLLOWING

YES

NO

Are you aware that you will be entering into a research study, providing HLI with your genotype and phenotype information, to be added to HLI's database?

Are you at least 18 years old?

Is your primary residence in the United States?

If not, do you have a domestic address?

Are you fluent in English?

If you are female, will you be pregnant at the time of the testing?

Do you weigh more than 400 pounds?

Do you have any known active infectious, communicable diseases?  
(HIV, AIDS, Tuberculosis, Hep A/B/C, etc.)

Do you have any known rare or undiagnosed disease?

Do you have an active cancer diagnosis?

Do you have any contraindications for the MRI, such as a pacemaker, aneurysm clip, cochlear implant or any other item in your body that might not be MRI safe?
